Chennai, India | [manushri.m21@gmail.com](mailto:manushri.m21@gmail.com) | +91 6381385930 | LinkedIn: [manushri-manavalane](#)

## EDUCATION

### M.Tech in Computer Science and Engineering

Sept 2025 - Present

Amrita School of Computing, Amrita Vishwa Vidyapeetham, Chennai, CGPA – 9.3

### B.Tech in Information Technology with Honors in Data Science

Nov 2021 - May 2025

Loyola-ICAM College of Engineering and Technology, CGPA – 8.56

## WORK EXPERIENCE

### Data Analytics Intern, Altair: Siemens Digital Industries and Software

Feb 2025 – Dec 2025

- Analyzed and maintained 6 sales dashboards on daily basis handling 5000+ records and supporting strategic decision-making for managers across EMEA regions; also contributed to the automation of dashboarding process.
- Involved in preparing reports and tracking KPIs to monitor the end-user engagement.

### Data Engineer Intern, Hackveda Limited

Jul 2023 – Mar 2024

- Executed tasks in Data Engineering and Analytics using SQL for data extraction, transformation and analysis (descriptive, predictive, and prescriptive), presented insights for projects including Stochastic Oscillator.

### Cyber Security, IBM Skills Build Program (AICTE and Edunet Foundation)

Dec 2022 – Feb 2023

- Developed a project on Image Steganography using Python, focusing on secure data concealment within digital images.
- Implemented steganography techniques to embed and extract hidden information for data protection.

## PROJECTS

### CXR-Multinet: A Multimodal Deep Learning Framework for Multi-Label Chest Disease Prediction

Sept 2025 - Nov 2025

- Implemented a multimodal framework using Vision Transformer (ViT) and FCNN, achieving 95% model accuracy.
- Trained the model on 150,000+ data samples and integrated MongoDB with a user-friendly frontend and scalable backend for end-to-end deployment.

### DAIO Project, Dr. Agarwal's Institute of Optometry

Sept 2024 - Apr 2025

- Developed an AI-based system for predicting visual perceptual skills and task switching abilities with automated identification of task types with 97% accuracy.
- Responsibilities included designing algorithm for detecting eye patterns, working on model development, and testing for improving the system's accuracy in detecting the task.

## RESEARCH PUBLICATIONS

### Aural Vision – Envisioning the Independence of the Visually Impaired

Jun 2024

- Published in IEEE, International Conference on Inventive Computation Technologies
- To design an AI-based vision system that enables visually impaired individuals to independently identify objects using real-time visual input and audio feedback, with scope for embedded and edge deployment.
- Successfully demonstrated accurate object recognition with low latency and approximately 85% accuracy.
- Computer Vision and Deep Learning techniques using Python, OpenCV, and AI/ML frameworks, with integration of sensor-based visual input for real-time processing.

## ONLINE CERTIFICATIONS

- Foundations of Responsible AI Learning - Northeastern University
- Google Cloud Career Launchpad: Data Analyst track
- Artificial Intelligence Primer Certification - Infosys Springboard

Sept 2025

Aug 2024

Sept 2023

## SKILLS

- Programming & Web Development: Python, C, Java, JavaScript (React.js), Flask, HTML/CSS
- Databases & Cloud: MySQL, MongoDB, Snowflake, ETL pipelines, Google Cloud Platform
- Data Analysis Tools: Power BI, Excel, AI Studio, Monarch

## ACHIEVEMENTS

- Conferred the LICET STAR Award (Best Outgoing Student)
- NCC Cadet (Rank: Corporal, C Certificate holder)
- Participated in 5+ National Level Hackathons securing prize positions

Mar 2025

Apr 2024

2023 - 2024
